# BarTender® *Label Printing Software*
## *Editions Available*

### Enterprise Edition

Our most powerful Edition includes features that simplify the integration of BarTender with other software products. This Edition is particularly helpful for label design and printing on larger networks.

- Includes All "Professional Edition" Label-Design Features

#### Plus:

- "Commander" Integration Utility
- ActiveX Automation
- SAP IDoc Interface (R/3 and mySAP.com)
- Print Job Logging
- Licensing Based on Number of Printers
- International Languages Included

***Enterprise Licensing:***
*The Enterprise Edition is intended for network users and automated processes. Licensing is based on the number of printers BarTender uses, allowing an unlimited number of network users to print to a predefined number of printers. Each local area network where BarTender is installed requires a separate license. Contact a Seagull representative for additional licensing information.*

### Professional Edition

This Edition of BarTender contains the features needed by experienced label designers without sacrificing the ease-of-use required by first-time users. Delivers a wide range of capabilities, including extensive data sourcing.

- All BarTender Label-Design Features
- All BarTender Graphics Features
- Licensing Based on Number of Workstations
- All Data-Access Features: ODBC, Text Files (no SAP Support)
- Full Printer Support, Printer Fonts
- All Data-Selection Features: SQL, Query, Pick List
- Visual Basic Script
- Custom Data-Entry Forms
- Command-Line Interface Option
- Password Protection
- Over 20 Bar Codes Supported
- Five 2D Codes
- Complete Serialization Options
- International Languages Available

***Professional and Basic Licensing:***
*The Professional and Basic Editions are intended for individual users, whether stand-alone or on a network. Licenses are based on the number of workstations on which BarTender is installed, allowing a predefined number of users to print to an unlimited number of printers.*

### Basic Edition

Designed for users who just need the essentials. This Edition limits data entry to the keyboard and excludes external data connectivity.

- WYSIWYG Design and TrueType Fonts
- All Popular Linear Bar Codes
- Embedded Graphics Support
- Lines and Boxes
- Full Printer Support, Printer Fonts
- No External Data Sourcing
- Custom Data-Entry Forms
- No 2D Bar Codes
- Limited Serialization
- International Languages Available

### International Language Support

BarTender is available in International Editions that support **on-demand** switching of the displayed user-interface language between the following:
