Product
Profile

- **The In-House Printing Solution**
  LabelShop is the ideal software for printing labels, tickets and tags in-house.

- **Superior User Interface**
  Combines powerful functions with ease-of-use. Outstanding multilingual support with screen prompts in 18 languages.

- **ODBC Support**
  Connect to your existing corporate databases or use the built-in database manager.

- **TrueType™ Font Support**
  Any Windows™ TrueType font may be used for maximum flexibility.

- **Graphic Flexibility**
  Incorporates various formats, and can scale, rotate and mirror your graphics.

- **Powerful Label Printing Solution**
  Use LabelShop PRO for label printing solutions in all environments. Develop command files for use in host systems or store in the printer.

- **ActiveX® Support**
  Use LabelShop PRO in integrated solutions with third party Windows applications.

- **Code Converter**
  Import your existing label formats and printer command language files from several printer manufacturers.

- **Supports** Windows 95/98, Me, NT 4.0, 2000 and XP.

LabelShop® 6 label design & printing software

LabelShop is the ideal bar code label software to meet your needs. The user-friendly interface combines powerful Windows based commands with the graphic flexibility to scale, rotate and mirror graphics. LabelShop guides you through designing and printing labels in-house quickly and easily. Users can display multiple labels, drag and drop or cut and paste objects between labels. Objects can also be imported from other applications using OLE objects like Clip Art and spreadsheet data.

LabelShop uses Intermec EasyCoder printers for maximum speed and high quality labels with bar codes, text and graphics.

The LabelShop program runs under Microsoft Windows and is available in these versions:

LabelShop START
LabelShop ULTRA
LabelShop PRO

LabelShop START provides basic label design functions, text, bar code, graphics, sequential numbering and keyboard input data, and comes free with all Intermec EasyCoder printers.

LabelShop ULTRA and PRO provide a range of additional features to perform labeling tasks for every possible situation. LabelShop PRO is also available in Network versions for 5 or up to 50 users.

Intermec 's LabelShop ULTRA and PRO versions supports ODBC for accessing existing corporate databases. This is valuable to ensure up to the minute information is printed on all bar code labels. This eliminates extra steps in the label design process as well as possibility of errors or outdated pricing or part numbers.

Using the Code Converter feature in ULTRA and PRO versions enables users to import existing label formats and printer command language files. This eliminates the depend-0ency of label design to the printer command language. Once imported, the data stream is converted to print on the EasyCoder printer of choice.

LabelShop PRO is not only a label printing software, but a powerful tool in label printing solutions. Develop command files for use in host systems or store them in the printer for simple printing from host. Use the Printer Output files to generate files to embed in your ERP system or the optional ERPLabel for SAP R/3 package.

Intermec 's family of LabelShop software offers a suite of choices whether the customer is a small business or a large company running their printers via the network. LabelShop can be used for label design in any application and provides excellent management tools.

LabelShop 6

General	START	ULTRA	PRO
Multiple document interface (displays several label files)	Yes	Yes	Yes
OLE Client (Insertion of WordArt, tables, etc.)	Yes	Yes	Yes
Label copy to clipboard (exports label as an image)			Yes
Undo/Redo function	1 level	40 levels	40 levels
Password (prohibits access to label design modification)		Yes	Yes
Hidden (unprintable) objects		Yes	Yes
Lock/Unlock objects			Yes
Insert files (allows insertion inside label of a separate label file)			Yes
Multiple Level Password protection (access rights per user)			Yes
Code Converter (converts a printer language file to print on any printer)		Yes	Yes
Grid View/Print		Yes	Yes
Label preview	Yes	Yes	Yes
Prompt languages *)	18	18	18
Help file languages *)	5	5	5
Printer Support	Intermec printers	Intermec/ Windows printers	Intermec/ Windows printers
Print only version (Runtime)			Yes
Network version			Yes
Text			
Text toolbar (shows properties in a specific screen)		Yes	Yes
Paragraph editing		Yes	Yes
Word processing text capabilities (fit-to-box)			Yes
Bar code			
Printer bar codes 1D & 2 D (depends on printer model)	29	29	29
Graphic 1D bar codes		26	26
Graphic 2D bar codes		10	10
Graphics			
Creation of geometrical figures	Yes	Yes	Yes
Graphics preview (visualization before opening graphic file)	Yes	Yes	Yes
Rotation (images and entire label)	Yes	Yes	Yes
Graphic formats supported	15	15	15
Color reduction (prints color graphics in grayscale)		Yes	Yes

*) European version only. Other markets have 4 languages.

Database	START	ULTRA	PRO
ASCII database		Yes	Yes
Database Manager		Yes	Yes
ODBC (Open DataBase Connectivity)		Yes	Yes
Multiple ODBC tables			Yes
Filters on tables (allows sorting of data from database)		Yes	Yes
SQL mode			Yes
Save query			Yes
Variables			
Dates	Limited	All formats	All formats
Variable images		Yes	Yes
Global variables (to be used on different label files)		Yes	Yes
Decimal value formatting		Yes	Yes
Counting bases	Decimal	Decimal Alphanum.	All formats
Linked counters			Yes
Formulas (calculation and sorting tool)		Limited	All formats
Addition of a variable to a date	Yes	Yes	Yes
Attached database			Yes
Filler (keyboard data entry)			
Customizable Filler screen (color, font, cell size)		Yes	Yes
Set input format		Yes	Yes
Minimum input length (sets the minimum number of digits)		Yes	Yes
Default values proposal		Yes	Yes
Automatic prompt		Yes	Yes
Printing			
Print to file	Yes	Yes	Yes
Network printing		Yes	Yes
Color printing on color printers		Yes	Yes
Tools			
Font Downloader (allows downloading of fonts to printer memory)	Yes	Yes	Yes
UCC/EAN 128 Wizard (help to create EAN labels)		Yes	Yes
Batch Print Manager			Yes
Tracking Report (for print jobs follow-up)			Yes
COMet (connection of external devices on serial port for automatic data entry)			Yes
POF (Print Object File) configuration tool			Yes
RFID programming (smart label writing/ reading capability)			Yes
Programming			
ActiveX Support			Yes

System requirements
- Microsoft Windows 95, 98, Me, NT4, 2000 or XP
- 130 MB hard disk space
- CD ROM drive
- Parallel port
- Mouse
