LabelShop® 6

Label Design and Printing Software

- **Design and print labels, tickets and tags in-house**

- **Three versions to fit any size of business**

- **Compatible with all Intermec EasyCoder printers**

- **Outstanding multilingual support in 18 languages**

- **ODBC/OLE database support**

- **Supports Windows 95/98, Me, NT 4.0, 2000, 2003 Server and XP**

LabelShop® is the ideal bar code labeling software which will meet your label design and printing needs. LabelShop guides you through designing and printing of labels in-house quickly and easily without the cost and inconvenience of relying on external resources.

Users can display multiple label formats on the screen, allowing them to drag and drop or cut and paste objects between label formats, which will simplify the label design process. Objects contained other applications, such as Clip Art or spreadsheet data, can be linked into the label format using ODBC/OLE.

LabelShop drives all Intermec EasyCoder printer models for maximum speed and high quality labels with bar codes, text and graphics.

Intermec's family of LabelShop software offers a suite of three choices suitable for small businesses or large corporations. LabelShop START provides basic label design functions, including text, bar code, graphics, sequential numbering and keyboard input data, and is free with all Intermec EasyCoder printers. LabelShop® ULTRA and LabelShop® PRO provide a range of additional features to perform labeling tasks for every possible situation. LabelShop PRO is also available in network versions for 5 or up to 50 users.

The ULTRA and PRO versions also support ODBC for accessing existing corporate databases, ensuring that up to the minute information is printed on all bar code labels reducing the possibility of errors such as outdated pricing or part numbers.

LabelShop PRO is not only a label printing software, but a powerful tool in label printing solutions. Develop command files for use in host systems, or store them in the printer for simple printing from host. Printer Output files can be embedded in your ERP system. Intermec ERPLabel™ or XMLLabel™ packages are used in conjunction with LabelShop for this process.

	LabelShop 6		
	START	ULTRA	PRO
General			
Multiple document interface (displays several label files	Yes	Yes	Yes
OLE Client (Insertion of WordArt, tables, etc.)	Yes	Yes	Yes
Label copy to clipboard (exports label as an image)			Yes
Undo/Redo function	1 level	40 levels	40 levels
Password (prohibits access to label design modification)		Yes	Yes
Hidden (unprintable) objects		Yes	Yes
Lock/Unlock objects			Yes
Insert files (allows insertion inside label of a separate label file)			Yes
Multiple Level Password protection (access rights per user)			Yes
Code Converter (converts a printer language file to print on any printer)		Yes	Yes
Grid View/Print		Yes	Yes
Label preview	Yes	Yes	Yes
Prompt languages*	18	18	18
Help file languages*	5	5	5
Printer support	Intermec printers	Intermec/ Windows printers	Intermec/ Windows printers
Print only version (Runtime)			Yes
Network version			Yes
Text			
Text toolbar (shows properties in a specific screen)		Yes	Yes
Paragraph editing		Yes	Yes
Word processing text capabilities (fit-to-box)			Yes
Bar code			
Printer bar codes 1D & 2D (depends on printer model)	29	29	29
Graphic 1D bar codes		26	26
Graphic 2D bar codes		10	10
Graphics			
Creation of geometrical figures	Yes	Yes	Yes
Graphics preview (visualization before opening graphic file)	Yes	Yes	Yes
Rotation (images and entire label)	Yes	Yes	Yes
Graphic formats supported	15	15	15
Color reduction (prints color graphics in grayscale)		Yes	Yes

	LabelShop 6		
	START	ULTRA	PRO
Database			
ASCII database		Yes	Yes
Database Manager		Yes	Yes
ODBC (Open DataBase Connectivity)		Yes	Yes
Multiple ODBC tables			Yes
Filters on tables (allows sorting of data from database)		Yes	Yes
SQL Mode			Yes
Save query			Yes
